

ATTO - Your Business Partner

For 25 years, ATTO has been the leader in storage and network connectivity, producing superior products for our OEM partners, enabling you to reach your business goals, faster. ATTO provides a wide range of end-to-end solutions to help customers better store, manage and deliver their data. With the ability to provide the widest range of products and technologies along with superior support, ATTO provides our partners with a unique competitive advantage.

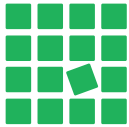

History of Proven Success

By partnering with the industry's leading storage, workstation, server and applications vendors, ATTO is the storage and network connectivity leader in multiple vertical markets. With a history of industry firsts and technology leadership, ATTO is able to provide a solution for the most difficult connectivity challenge – low latency, high-bandwidth transactions.

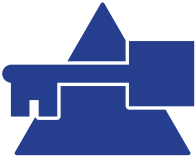

Accelerated Time-to-Market

ATTO provides the widest range of high-performance storage and network connectivity products in the industry. With this level of expertise and superior support from a single partner, you have the tools you need to deliver a solution that can get you to market to take full advantage of sales opportunities and reduce your time-to-revenue.

Differentiated Solutions

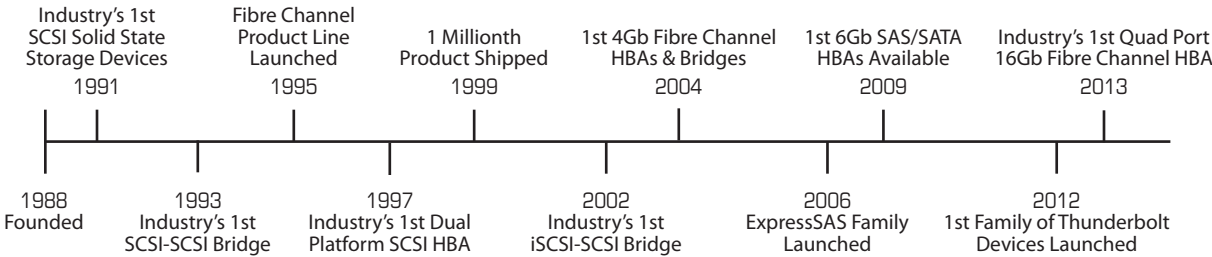

ATTO supports your goals by providing customized hardware and software solutions to differentiate your solutions from the competition. With features such as Target Mode, embeddable boards and customizable GUIs, ATTO can help create a solution that is unique to your needs. Working with ATTO enables you to have the flexibility to work on more specialized programs and projects, providing you with a competitive advantage.

Unique Partnering and Support Opportunities

ATTO delivers unique solutions that help the most innovative companies expand their footprint in their customer base. By providing direct customer/application support, ATTO becomes an extension of your design and engineering teams. In addition, by complimenting your sales and marketing efforts, ATTO ensures your programs and designs are converted into revenue.

ATTO Technology, Inc. - A History

Powering the World's Networks & Storage

Products/Technology

ATTO manufactures the broadest range of storage and network connectivity products in the industry, designed for high-end storage environments. Our solutions provide a high level of connectivity to interfaces including Fibre Channel, SAS, SATA, iSCSI, 10GbE, FCoE and Thunderbolt™.

Host Bus Adapters & RAID Adapters

- ExpressPCI SCSI - Host Bus Adapters
- Celerity FC - Fibre Channel Host Bus Adapters
- ExpressSAS - SAS/SATA Host Bus Adapters
- ExpressSAS - RAID Adapters

Ethernet Adapters

- 10GbE NICs
- 10GbE FCoE CNAs

Desklink Devices

- ThunderLink Desklink Devices
- ThunderStream Desklink Devices
- Embedded ThunderStream SC 3808E

Bridges

- FibreBridge™ - FC-to-SAS
- Embedded FibreBridge 6500E

RAID Storage Controllers

- FastStream™ SC
- Embedded FastStream SC 5550E/8550E/9000E

Switches

- FibreConnect™ - 8Gb/s & 16Gb/s Fibre Channel

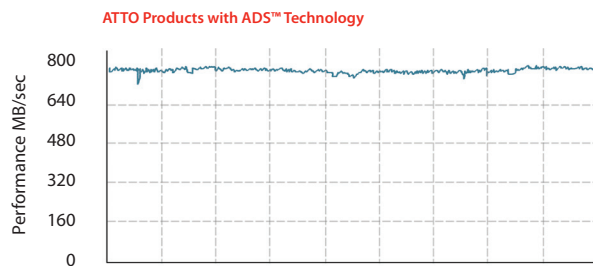

Management Software:

- Express Power Center - RAID Striping Utility for Windows®
- Xtend SAN - iSCSI Initiator for Mac® OS X

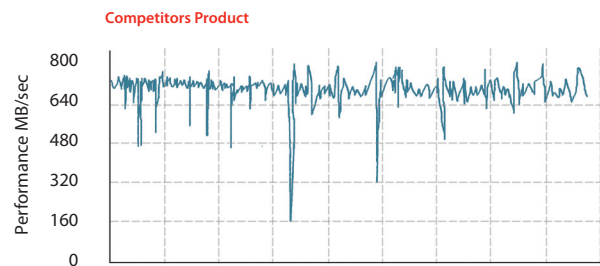

ATTO Exclusive Features

ATTO proprietary features help ensure your data is stored quickly, smoothly and securely by giving you control to fine tune and maximize your performance. All ATTO products are built around our core technology known as Advanced Data Streaming (ADS™).

- Advanced Data Streaming Technology (ADS™)
 - ATTO's heritage of pioneering solid-state storage technology means that all products are engineered to manage latency in real-time environments and have the ability to handle larger workloads and client counts:
 - Higher application performance = better productivity
 - Better transaction processing = faster time to revenue & critical business decisions

Data transfer performance is smooth and reliable

Disrupted transfer with peaks and drops
Transfer rate dips below optimal performance levels

ATTO also has many other unique features to help set your solutions apart from the rest.

- XCopy
- CacheAssure™
- MultiPath Director™
- DVRAID™
- AOS (ATTO embedded OS)
- DriveAssure™
- Virtual Drive Response

Interoperability/Certifications

ATTO tests and certifies our products with industry leading servers, workstations, storage, operating systems, drive and application software vendors to ensure smooth integration into existing environments. In addition, ATTO Technology is an ISO 9001:2008 certified company that will supply highest quality products and services across the globe to our customers.
