ThunderLink® offers 4X more Interoperability

TESTING WITH MULTIPLE THIRD-PARTY VENDOR PRODUCTS EXTENDS ASSURANCE OF COMPATIBILITY

ABOUT ATTO TECHNOLOGY, INC.

For 30 years, ATTO Technology, Inc. has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host and RAID adapters, network adapters, storage controllers, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS/SATA, iSCSI, Ethernet, NVMe, NVMe over Fabrics and Thunderbolt. ATTO is the Power Behind the Storage.

All trademarks, trade names, service marks and logos referenced herein belong to their respective companies.

Thunderbolt™ adapters are the connectivity tool of choice for content collaboration, production and distribution. From capture and ingest to backup and archiving, it is important to have tested interoperability to ensure compatibility amongst workflow components.

ATTO Technology ThunderLink® adapters have been tested with a greater variety of third-party vendor products than any other Thunderbolt enabled product line on the market, resulting in 4Xs more interoperability in its portfolio than the closest competitor. This includes Tier One storage vendors and dozens of industry leaders. ATTO ThunderLink is already tested and certified as compatible with a larger range of solutions, giving users the assurance that ATTO adapters will work out of the box without the need for any special configuration or installation assistance.

Greater compatibility and interoperability translates into more connectivity options and simpler deployments for seamless workflow integration. Their interoperability is carried across a wide range of categories including OS, storage systems, tape, switches, AV hardware, software applications, drives and workstation platforms. In the diagram included, for example, the ATTO Ethernet Thunderbolt adapters are certified with almost 20 storage vendors, ensuring compatibility in the most data-intensive applications and workflows. This allows integrators significantly more options for tested compatibility.

With a 30 year history of innovation and the broadest portfolio of interoperable solutions, customers know that the ATTO engineering support team will be capable of answering any questions that may arise during use.

Selecting ATTO ThunderLink adapters means the freedom to select hardware and software without worrying about limitations.
