

ABOUT ATTO

For nearly 30 years, ATTO Technology, Inc., has been a global leader across the IT and media and entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works collaboratively with partners to deliver a wide range of end-to-end, customized solutions to better store, manage and deliver big data. With a focus toward markets that require higher performance and with a dedication to working as an execution of customer’s design teams, ATTO manufactures host and RAID adapters, network adapters, storage controllers, Thunderbolt-enabled devices, switches and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS, SATA, iSCSI, 40/10GbE, FCoE and Thunderbolt. Distributing its cutting-edge products worldwide through Original Equipment Manufacturers (OEMs), systems integrators, value added resellers (VARs) and authorized resellers, ATTO is the Power Behind the Storage.

ThunderLink® and ThunderStream® offer 4Xs more Interoperability

TESTING WITH MULTIPLE THIRD-PARTY VENDOR PRODUCTS EXTENDS ASSURANCE OF COMPATIBILITY

Thunderbolt™ devices are the connectivity tool of choice for content collaboration, production and distribution. From capture and ingest to backup and archiving, it is important to have tested interoperability to ensure compatibility amongst workflow components.

ATTO Technology’s ThunderLink® and ThunderStream® devices have been tested with a greater variety of third-party vendor products than any other Thunderbolt enabled product line on the market, resulting in 4Xs more interoperability in its portfolio than the closest competitor. This includes Tier One storage vendors and dozens of industry leaders. ATTO’s ThunderLink and ThunderStream are already tested and certified as compatible with a larger range of solutions, giving users the assurance that ATTO’s devices will work out of the box without the need for any special configuration or installation assistance.

Greater compatibility and interoperability translates into more connectivity options and simpler deployments for seamless

workflow integration. Their interoperability is carried across a wide range of categories including OS, storage systems, tape, switches, AV hardware, software applications, drives and workstation platforms. In the diagram below, for example, ATTO’s 16Gb Fibre Channel Thunderbolt devices are certified with 16 storage vendors, ensuring compatibility in the most data-intensive applications and workflows. This allows integrators significantly more options for tested compatibility.

With a nearly 30 year history of innovation and the broadest portfolio of interoperable solutions, customers know ATTO’s engineering support team will be capable of answering any questions that may arise during use.

Selecting ATTO’s ThunderLink and ThunderStream devices means the freedom to select hardware and software without worrying about limitations.
