

## High-Performance RAID for Direct Attached Storage

## Demo Description

### ATTO Products

#### ExpressSAS R380 RAID Adapter ATTO Configuration Tool

- ExpressSAS RAID Adapters offer cost-effective, high-performance RAID protection for direct attached storage allowing for multiple streams of SD and HD video editing
- Maintain full stream counts (even during drive failure and rebuilds) in a SAS or SATA environment —minimize downtime to meet project deadlines
- Fast rebuilds (RAID 5) mean less time that you are exposed to another drive failure—tunable rebuild priority for your specific workflow
- Host level RAID protection connects to inexpensive JBOD storage making this solution more affordable when expanding than using costly RAID arrays
- Expand your storage by connecting up to 64 devices
