

High-Performance Collaborative Workflow Solution: SAS/SATA RAID Storage Controllers

Benefits of ATTO's FastStream RAID Storage Controllers

Shared RAID Solutions for High-Performance Video Environments

- **Enable a collaborative workflow** – share SAS/SATA JBOD storage among several workstations without the need for a Fibre Channel switch
- **High performance data protection** – provides RAID protection while maintaining application performance
- **Supports full stream counts in degraded mode** - minimize downtime so projects finish on time
- **Proactive Media Error Handling** - DriveAssure™ prevents RAID Groups from becoming degraded to ensure uninterrupted access to media
- **Latency-management ADS™ technology** - manages real-time system performance to maximize shared storage performance
- **Supports many video types** - edit up to 5 streams of 10-bit uncompressed high-definition or 30 streams of DVCPro® HD video
- **Keep data moving** - advanced load balancing and failover with FastStream and Multipathing for Mac® OS X, Windows®, and Linux
- **Easy-to-use** - ExpressNAV™ Storage Manager for setup, management and maintenance of all RAID Groups
- **CacheAssure™ battery-less backup** - environmentally friendly cache protection in the event of a system or power failure

Provides shared bandwidth of up to 1400 MB/s to enable a high-performance workflow
