FOR IMMEDIATE RELEASE

ATTO Technology Showcases NetApp Data Fabric Connectivity Concurrent with NetApp INSIGHT 2020

*NetApp benchmarks show ATTO Fibre Channel HBAs have 50% Less Latency than
Closest Competitor*

Amherst, NY (October 20, 2020) – [ATTO Technology, Inc.](#), a global leader of network and storage connectivity and infrastructure solutions for data-intensive computing environments for over 30 years, announced today they will feature NetApp® solutions on an ATTO NetApp INSIGHT 2020 event page October 26-29, 2020.

ATTO Technology and NetApp recently collaborated to find the best way to address workflow challenges in media production environments. [NetApp independently benchmarked ATTO Fibre Channel HBAs](#) and found ATTO products were able to achieve 38.5GB/s equating to 32 simultaneous 4K streams at 24fps without any dropped frames. This is 50% less max latency and overall less average latency than the closest competitor.

The ATTO NetApp INSIGHT event page will provide the latest information on ATTO XstreamCORE® intelligent bridges. [ATTO XstreamCORE 7600](#) is a third-generation accelerated protocol bridge solution that enables synchronous site-to-site replication by providing low latency 32Gb Fibre Channel connections to NetApp flash and disk systems while maintaining high resiliency. [It is a key component of the NetApp MetroCluster™ solution.](#)

As a member of the NetApp Alliance Partner Program, ATTO high-performance connectivity products help to empower data-driven enterprises when combined with NetApp solutions. Along with certified solutions for typical enterprise storage architectures, ATTO plays a key role in NetApp's high-availability solutions.

CIO Review has recognized ATTO as a top NetApp vendor for 2018 and once again for 2020. The latest article, [“ATTO and NetApp: Delivering Future-Proof Data Storage and Availability Solutions”](#), provides insight into how ATTO and NetApp collaborate to optimize IT infrastructures, deploy new capabilities, and ensure business continuity.

ATTO certified connectivity options for NetApp storage and data management solutions include [ATTO XstreamCORE Fibre Channel-to-SAS/SATA storage controllers](#) and [ATTO Celerity™ 32Gb and 16Gb host bus adapters](#) (HBAs). Additionally, ATTO tests [ATTO ThunderLink® Thunderbolt™ adapters](#), [ATTO FastFrame NICs](#), and [ATTO ExpressSAS HBAs](#) for performance and compatibility with NetApp solutions.

For more information and updates, visit the [ATTO NetApp INSIGHT 2020 event page](#).

ABOUT ATTO

For over 30 years ATTO Technology, Inc. has been a global leader across the IT and media & entertainment markets, specializing in network and storage connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with customers and partners to deliver end-to-end solutions to better store, manage and deliver data, often as an extension of their design teams. ATTO manufactures host and network adapters, storage appliances and controllers, intelligent bridges, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS, SATA, iSCSI, Ethernet, NVMe and Thunderbolt. ATTO is the Power Behind the Storage.
