

ThunderRack Best Practice Guide

ATTO

ThunderRack shelving enclosure gives the ability to easily rack units, whether in an on-set cart or standard rack in the data center. Now you can seamlessly integrate ThunderLink adapters into existing workspaces and keep units safe and secure all while freeing up desktop space.

Please contact ATTO Technical Support (716-691-1999 Ext. 242) for more information.

The following guidelines are suggested for best practice when using the ThunderRack:

- To insert units remove center brace to slide units into front windows
- Velcro strips are available for use to secure and align power supply units
- When using the rail kit use replacement ears to allow for units to fully slide into rack
- Remove center brace when using rail kit for continued access to insert and remove units

Please see below reference images for assistance with configuring the ThunderRack
