

DELL TOWER WORKSTATIONS

- Precision Tower 5810
- Precision Tower 7810
- Precision Tower 7910

DELL RACK WORKSTATION

- Precision Rack 7910

DELL MOBILE WORKSTATION

- Precision Series

ATTO PRODUCTS

- ExpressSAS® 6Gb RAID adapter
- Thunderbolt™ adapters
 - FC 2162 - 16Gb Fibre Channel
 - FC 2082 - 8Gb Fibre Channel
 - SH 2068 - 6Gb SAS
- Celerity™ 16Gb Fibre Channel host bus adapter

OPERATING SYSTEMS

- Windows® 7
- Windows® 8.1
- Windows® 10
- RedHat® Linux®
- SUSE® Linux®

HOW TO BUY:

- **Dell Sales** - 1.800.456.3355
- **ATTO Sales** - 1.716.691.1999

ATTO Product	Dell SKU	ATTO SKU
ExpressSAS R680 with CacheAssure™	A9012942	ESAS-R680-CA1
ThunderLink® FC2082	A7899813	TLFC-2082-D00
ThunderLink FC2162	A7843268	TLFC-2162-D00
Celerity™ 82EN	A7945555	CTFC-82EN-000
Celerity 84EN	A5564976	CTFC-84EN-000
Celerity 162EN	A7006940	CTFC-162E-000

Specialized, compute-intensive applications used for manufacturing and design, oil & gas, media & entertainment, architecture and engineering require more than a traditional desktop computer. For workloads including rendering, editing, simulation and analysis, you need a high-performance workstation outfitted with the latest multicore processors and powerful onboard graphics.

Dell Precision™ tower, rack and mobile workstations are purpose-built, high-performance solutions that deliver results quickly and create the best possible user experience for high-level professional applications. Available in independent software vendor (ISV)-certified configurations designed for industry-specific applications, Dell Precision workstations speed up workflows, reduce time to market and pump out more product design iterations in less time.

For nearly 30 years, ATTO Technology Inc. has been developing storage connectivity and infrastructure solutions for data-intensive computing environments. ATTO's experience with engineering advanced technology into real-world solutions provides customers with a unique competitive advantage. ATTO's expertise in storage and network connectivity enables us to provide innovative technology for industry leading partners like Dell. For Precision tower, rack and mobile workstations, our certified solutions include Celerity™ 16Gb host bus adapters (HBAs), ExpressSAS® 6Gb RAID adapters and ThunderLink® Thunderbolt™ adapters.

Celerity 16Gb HBAs are optimized for extremely low latency, high-bandwidth transfers for data intensive and high-transaction rate applications. Available in single-, dual- and quad- port configurations, they feature ATTO MultiPath Director™, a proprietary driver that provides the industry's only multipathing solution to connect workstations, as well as servers, to high-availability, high-performance enterprise-class storage for shared workflows.

ExpressSAS 6Gb RAID adapters provide high-performance data protection to direct attached SAS/SATA JBOD storage. They include proprietary features such as

Adaptive Path Optimization™ to maximize storage availability and performance, and DriveAssure™, which provides bounded latency and user controls to prevent premature drive failures and downtime.

ATTO ThunderLink adapters allow Thunderbolt technology enabled platforms including Dell Precision mobile workstation to connect to high-performance storage and networks. With ATTO ThunderLink adapters, creative, engineering and scientific professionals using small form-factor compute platforms gain access to the full features and functionality of ATTO Fibre Channel, SAS/SATA and RAID solutions.
