

## ATTO ThunderLink® Devices Connect HP Mobile Workstations and Tape

### ABOUT ATTO TECHNOLOGY

For nearly 30 years, ATTO Technology, Inc., has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host and RAID adapters, network adapters, storage controllers, Thunderbolt™ adapters and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS, SATA, iSCSI, 40/10GbE, NVMe and Thunderbolt. ATTO is the Power Behind the Storage.

All trademarks, trade names, service marks and logos referenced herein belong to their respective companies.

### ABOUT HP ENTERPRISE

HP Enterprise creates new possibilities for technology to have a meaningful impact on people, businesses, governments and society. With the broadest technology portfolio spanning printing, personal systems, software, services and IT infrastructure, HP Enterprise delivers solutions for customers' most complex challenges in every region of the world. More information about HP is available at <https://www.hpe.com>

ATTO Technology, Inc., a leader in high-performance storage connectivity solutions, consistently delivers products that maximize system reliability and uptime. With proven interoperability with leading software and hardware vendors including HP, ATTO offers a broad range of storage connectivity solutions for the media & entertainment industry. The addition of Thunderbolt™ I/O technology to its portfolio means that creative professionals can easily carry out data intensive 2K, 4K, 3D stereoscopic and HD video editing with multiple layers of complex, uncompressed real-time effects on set or at the studio at previously unattainable speeds.

Thunderbolt technology is what makes the HP ZBook Mobile Workstation ideal for demanding workloads in fast-paced digital media environments. Mark Fleischhauer, tape storage solutions engineering manager at HP, has tested a reliable solution powered by an ATTO Thunderbolt to 6Gb SAS/ SATA adapter. Fleischhauer connected an HP ZBook Mobile Workstation to an HP StoreEver LTO tape drive via ATTO ThunderLink® SH 2068, a portable, self-powered Thunderbolt adapter that provides access to external SAS or SATA storage arrays.

With the solution that Fleischhauer tested, simply drag and drop files to and from your Thunderbolt technology-enabled laptop and tape file system. Imagine you're on set and need to quickly create multiple copies of the digital masters from the cameras. Just copy the files from the camera's memory card to your laptop and LTO tape drive, insert a new tape and create a second copy. Now you can share your content, as well as archive it for additional protection.

ATTO has a full line of products that incorporate the latest revolutionary I/O technology, Thunderbolt 2. To ensure cross-compatibility, ATTO Thunderbolt 2 products support multiple operating system, port and driver options so that users can preserve their existing Thunderbolt investments and maintain compatibility with multiple platforms.
