

Dual 10GbE (SFP+ LC Optical) ports

Dual 10GbE (10GBASE-T) ports

ATTO 10GbE to Thunderbolt™ adapters provide maximum throughput for high bandwidth network connectivity for demanding IT and media and entertainment applications.

TECHNICAL FEATURES

- Supports 4K video file transfer and display simultaneously with dual 20Gb/s Thunderbolt 2
- Supports ATTO Xtend SAN™ iSCSI initiator
- Daisy chain up to five additional Thunderbolt technology enabled devices
- Backwards compatible with 10Gb/s Thunderbolt
- Exclusive Advanced Data Streaming (ADS™) Technology
- Minimized interrupts for low latency
- TCP, UDP and IPv4 checksum offloading and Tx/TCP segmentation offloading
- Industry's lowest power consumption
- Three year standard product warranty
- RoHS Compliant

INDUSTRY PROVEN TECHNOLOGY

ATTO has over 25 years of experience developing first-to-market high performance and reliable storage connectivity solutions for customers. ATTO ThunderLink® Ethernet adapters now provide creative professionals using Thunderbolt™ enabled hosts, cost effective access to storage not previously available using FireWire or USB. The integrated family of ThunderLink adapters boasts an extensive list of customer design wins and certifications with respected industry partners.

FLEXIBLE CONNECTIVITY SOLUTIONS

ATTO 10GbE adapters provide the most flexible and scalable connectivity for today's high bandwidth content creation environments. By leveraging support for software iSCSI initiators, including ATTO Xtend SAN™, ThunderLink 10GbE adapters can support both local and storage area networks. ThunderLink 10GbE adapters offer driver support for macOS® and Windows®, providing a single connectivity solution for customers with heterogeneous operating system environments.

PERFORMANCE ENGINEERED

With 10Gb/s data transfer rates and multiple offloads (TCP, IPv4, UDP), ATTO Ethernet devices are the premier connectivity choice for bandwidth-intensive applications such as data back-up and restoration, IP content delivery, medical imaging, and video rendering. With multi-core processors driving the need for higher bandwidth, ThunderLink 10GbE delivers superior throughput to meet that need.

ADVANCED MANAGEMENT TOOLS

ThunderLink 10GbE adapters provide a common foundation for both local and storage networks. The ThunderLink leverages standard OS management and monitoring tools to dramatically reduce the cost and complexity of a data center's administration and infrastructure.

THUNDERLINK OPPORTUNITIES

ATTO ThunderLink adapters provide a solution for those with Thunderbolt enabled macOS® or Windows® workstations seeking to connect to EMC storage via Ethernet. Thunderbolt adoption has expanded to over 100 million Thunderbolt equipped computers. Ideal environments include media & entertainment, universities with media departments and graphics- or data bandwidth-intensive environments. ATTO 10GbE ThunderLink adapters provide portability, speed, flexibility and ease of use when connecting workstations to Ethernet networks and storage devices.
