

SOLUTION BRIEF

The Power Behind the Storage

Connecting Dell® Precision Mobile Workstations to a 40GbE Network Using Thunderbolt™

DELL MOBILE WORKSTATIONS

- Precision™ 7000 Series
- Precision 5000 Series

ATTO THUNDERLINK® THUNDERBOLT™ ADAPTERS

- TLNQ 3402 – Thunderbolt 3 to Dual Port 40Gb Ethernet

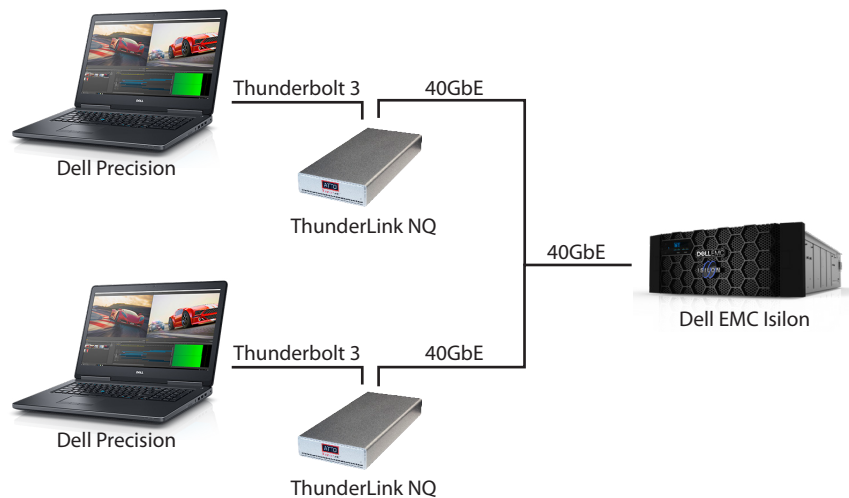

EXPAND OPPORTUNITIES AND SELL INTO NEW MARKETS

Specialized, compute intensive applications used for media & entertainment, manufacturing and design, oil & gas, game development, imaging or healthcare require mobile workstations outfitted with powerful graphics, processors and memory. High-performance, low-latency connectivity to storage is also a must have.

Thunderbolt™ 3 is a technology that offers high throughput 40Gb/s to peripheral devices. More importantly, it brings versatility to traditionally limited mobile computers. It is changing how mobile users think about external storage by opening up many new use cases. ATTO ThunderLink® NQ adapters enable mobile workstations and all-in-ones to connect to high performance 40Gb networks and network attached storage (NAS).

The amount of data utilized by mobile workstation applications is continually growing. Tapping into the power of the ATTO Thunderbolt 3 to 40GbE adapters will save orders of magnitude of time and money reading, writing and archiving data. ATTO ThunderLink adapters combine a new balance of mobility, simplicity, flexibility and performance.
