

ABOUT ATTO

For 30 years, ATTO Technology, Inc. has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host and RAID adapters, network adapters, storage controllers, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS/SATA, iSCSI, Ethernet, NVMe, NVMe over Fabrics and Thunderbolt. ATTO is the Power Behind the Storage.

All trademarks, trade names, service marks and logos referenced herein belong to their respective companies.

Fabric MetroClusters with ATTO FibreBridge® 7500

BUILDING A BUSINESS CONTINUITY SOLUTION

ATTO Technology, Inc. FibreBridge® storage controllers enable stretch clusters by enabling low latency Fibre Channel connections to SAS storage. Aggregate storage up to 240 drives while Data ONTAP® manages reads and writes to multiple sites while maintaining high resiliency.

ATTO FibreBridge® 7500 storage controllers work well for two-, four- and eight-controller solutions and offers high performance:

- <4 microseconds of latency
- 735,000 4K IOPS per controller
- 3,200 MB/s per controller

WHERE TO USE FABRIC METROCLUSTERS

CLUSTERS ACROSS METROPOLITAN AREAS

- Avoid data loss in the event of a disaster up to 300km
- Protect financial, medical or business assets at a second site

SAME CAMPUS OR FACILITY

- Maintain 24/7 uptime access to files
- Keep a production site running non-stop
- Provide a high performance medium to migrate data between sites

METRO-CLUSTER BENEFITS

- Zero planned and unplanned down time
- Workload mobility
- Cross-site automated load balancing
- Enhanced downtime avoidance
- Increased on-site data availability
- Disaster avoidance (workloads can be moved between sites)

FABRIC METROCLUSTER UP TO 300KM
