**MetroClusters with ATTO FibreBridge® 7600N**

**Building a Business Continuity Solution**

ATTO FibreBridge® storage controllers enable stretch clusters by enabling low latency Fibre Channel connections to SAS storage. Aggregate storage up to 240 drives while Data ONTAP® manages reads and writes to multiple sites while maintaining high resiliency.

ATTO FibreBridge 7600 storage controllers work well for two-, four- and eight-controller solutions and offers high performance:

- <4 microseconds of latency
- 1.2M 4K IOPS per controller
- 6,400 MB/s per controller

**Where to use MetroClusters**

**Clusters across Metropolitan areas**
- Avoid data loss in the event of a disaster up to 300km
- Protect financial, medical or business assets at a second site

**Same Campus or Facility**
- Maintain 24/7 uptime access to files
- Keep a production site running non-stop
- Provide a high performance medium to migrate data between sites

**Metro-Cluster Benefits**

- Zero planned and unplanned down time
- Workload mobility
- Cross-site automated load balancing
- Enhanced downtime avoidance
- Increased on-site data availability
- Disaster avoidance (workloads can be moved between sites)

**MetroCluster up to 300km**

---

**About ATTO**

For 30 years, ATTO has been a global leader across the IT and media & entertainment markets, specializing in network and storage connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer’s design teams, ATTO manufactures host adapters, network adapters, storage controllers, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS/SATA, iSCSI, Ethernet, NVMe, NVME over Fabrics and Thunderbolt. ATTO is the Power Behind the Storage.
