

ABOUT ATTO TECHNOLOGY, INC.

For over 30 years ATTO Technology, Inc. has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host bus adapters, network adapters, storage controllers, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS/SATA, iSCSI, Ethernet, NVMe, NVMe over Fabrics and Thunderbolt. ATTO is the Power Behind the Storage.

All trademarks, trade names, service marks and logos referenced herein belong to their respective companies.

ATTO ThunderLink® Thunderbolt™ Ethernet Adapters

ATTO ThunderLink® Thunderbolt™ adapters deliver creative, engineering and technical professionals high performance and low latency Thunderbolt connectivity. Purpose-built to enhance any workflows ATTO ThunderLink allows customers to:

- Increase productivity
- Decrease costs by incorporating better workflow processes
- Allow for quality deliverables to be produced on schedule and on budget

PERFORMANCE AND SUPPORT

- ATTO is a leading manufacturer of media solutions. We understand the intricacies of media workflows and have optimized our products for these environments.
- Smooth and reliable data delivery via ATTO Advanced Data Streaming (ADS™) Technology allows users to maintain the highest consistent performance while working with HD, 2K, 4K and higher formats.
- ATTO has a set of tools to help optimize our drivers for various environments. For example: ATnetstat will display lower layer, frame level statistics. This distinct layering framework provides a structured approach to help in tuning and identifying problems, allowing for performance and throughput optimization.
- Simple, intuitive drive installation procedure with one click optimizations that free up time used in managing equipment.
- Three Year Warranty.
- Backed by an extensive history of expertise in connectivity solutions, ATTO has an in-house support team ready to diagnose technical issues and resolve them in a timely manner.
- Frequent maintenance releases provide customer updates that enhance overall performance.

DESIGN

- Designed to be energy efficient, with a low profile, quiet and simple to stack, rackmountable and ready for instantaneous deployments into existing infrastructures.
- All Thunderbolt and protocol ports are on a single side for easy connectivity.
- Kensington™ Security Slots provide a simple solution, ideal for studios, offices and education facilities, allowing units to be secured to a fixed location.
- Locking power supplies mean units are powered, ready-to-go and that accidental disconnects are prevented.
- ATTO ThunderRack shelving unit is purpose-built to fit ATTO adapters into rackmount environments.

WORKFLOW AND INTEROPERABILITY

- Any needed optics (SFP+, QSFP+) are already included and rigorously tested to assure compatibility and data integrity.
- Both Mac® and Windows® Thunderbolt™ certification enables collaborative workflows.
- ATTO is the only vendor with 40GbE, 25GbE and 10GbE purpose-built Thunderbolt solutions.
- Choose from Thunderbolt 3 and 2 connectivity options.
- Complementary products of ATTO 40GbE, 25GbE and 10GbE NICs and XtendSAN™ iSCSI initiator.
- ATTO extensively tests their Thunderbolt products for interoperability with all major Tier 1 storage vendors. This allows customers to build out a workflow with confidence the components will be compatible and will incorporate into existing storage and switch workflows.
