

ABOUT ATTO

For nearly 30 years, ATTO Technology, Inc., has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host and RAID adapters, network adapters, storage controllers, Thunderbolt™ adapters and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS, SATA, iSCSI, 40/10GbE, NVMe and Thunderbolt. ATTO is the Power Behind the Storage.

The future of video is rapidly approaching higher resolutions. Many content creators are ready to work in 4K, and ATTO Technology is ready to help make the transition easier thanks to Thunderbolt™ 3 to 40GbE adapters.

ATTO Technology Thunderbolt 3 adapters bring the speed of 40Gb/s Thunderbolt to 40Gb Ethernet infrastructures, providing the high-performance connectivity needed to transfer content data to Ethernet networks and storage. Tapping into the power of 40GbE will allow filmmakers and others in the M&E industry to achieve true 4K workflows without needing to compress the files first. ATTO Thunderbolt to 40GbE adapters make this possible today, ensuring high availability for critical applications. This allows for more time spent creating and less downtime.

With speeds up to 40Gb/s, Thunderbolt 3 provides double the speed of Thunderbolt 2 and enough bandwidth to support four times the data and twice the video bandwidth of any other cable, making it the smart choice for content creation. This makes ATTO Thunderbolt to 40GbE adapters a perfect choice for work in the field on next-generation mobile workstations and all-in-ones.

ATTO Thunderbolt 3 to 40GbE adapters are a flexible and scalable solution, allowing users to grow their infrastructure as needed. Many users might be using a 10GbE connectivity solution now, but

upgrading to 40GbE provides superior performance over 10GbE with room to grow as data demands increase, making them a future-proofing solution to meet the growing demands of storage capacity driven by higher resolution production.

As the move to 4K workflows picks up speed, the demand for more bandwidth will increase as well. Thunderbolt 3 to 40GbE is valuable at all stages of the content creation workflow, from capture and ingest to backup and archiving. Prepare today for more data-intensive workflows with ATTO Thunderbolt 3 to 40GbE adapters.
