

ABOUT ATTO TECHNOLOGY, INC.

For 30 years, ATTO Technology, Inc. has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host and RAID adapters, network adapters, storage controllers, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS/SATA, iSCSI, Ethernet, NVMe, NVMe over Fabrics and Thunderbolt. ATTO is the Power Behind the Storage.

Take Full Advantage of Fibre Channel Speed with ATTO Thunderbolt™ 3 to 16Gb Fibre Channel ThunderLink®

With the introduction of new Thunderbolt™ 3 platforms and devices, users are curious about the big changes from generation to generation and what they'll get from investing in a new device. Will it really improve workflows or make a noticeable difference in performance to upgrade to a Thunderbolt 3 compatible device?

In a word, yes.

ATTO Technology, new Thunderbolt 3 to 16Gb Fibre Channel ThunderLink® 3162 allows users to unleash the full power of Gen 6 Fibre Channel, boosting throughput over previous generations of Fibre Channel capabilities used with Thunderbolt platforms.

Thunderbolt 3 allows for 100% more bandwidth than Thunderbolt 2, meaning better streaming rates, faster throughput and the ability to move more data even faster, both in the field and in the editing bay. When using 16Gb Fibre Channel on a Thunderbolt 2 platform, speed is bottlenecked by Thunderbolt's limitations. Connecting a 16Gb Fibre Channel adapter to a

Thunderbolt 3 platform eliminates that bottleneck, providing sufficient support for streaming uncompressed 4K video workflows.

New Thunderbolt platforms, and ATTO ThunderLink adapters as well, utilize a USB-C style connector, making it possible to directly connect with new hosts. The slim form factor of the ThunderLink adapter makes it an easily portable connectivity solution for mobile workstations, laptops and servers. It is certified for both Mac® and Windows®, allowing for a wide range of connectivity options.

ATTO Thunderbolt 3 to 16Gb Fibre Channel adapter is a future-proof solution that is backwards compatible with Thunderbolt 2 devices with the use of a legacy adapter and, as always, features ATTO proprietary Advanced Data Streaming (ADS™) and MultiPath Director™ technologies for latency management and load balancing. A simple configuration tool allows for the management and monitoring of Thunderbolt products and ATTO host bus adapters from a single pane of glass, increasing ease of use.

Get double the throughput of Thunderbolt 2, with speeds up to 2750 MB/s with ATTO Thunderbolt 3 to 16Gb Fibre Channel ThunderLink adapter and keep creating at the speed of life.
