FOR IMMEDIATE RELEASE

ATTO Technology Shows New Way to Expand and Re-Purpose Storage at 2019 HPA Tech Retreat

Amherst, NY (January 28, 2019) – [ATTO Technology, Inc.](http://atto.com), a global leader of network and storage connectivity and infrastructure solutions for data-intensive computing environments for over 30 years, will showcase their new [ATTO XstreamCORE® 8200](#) and demonstrate its capabilities at the HPA Tech Retreat, Feb. 11-15, 2019 in Palm Desert, CA.

ATTO XstreamCORE 8200 is a new hardware accelerated protocol bridge with storage controller features that allows multiple workstations to share a pool of SAS storage over an iSCSI or iSER network. With XstreamCORE 8200 you can easily configure and manage pooled block storage using an interface far less complex than traditional server interfaces. The pooled storage can be assembled using new or re-purposed compatible storage hardware.

This solution is a great complement to NAS workflows used by media professionals and adds much needed speed and flexibility to these workflows. XstreamCORE 8200 increases asset availability, provides a means to quickly archive and retrieve content, and users can implement a tiered storage strategy combining SAS SSDs, HDDs or tape and connect to storage over Ethernet.

XstreamCORE 8200 features two 40Gb Ethernet input connectors and four x4 12Gb/s Mini-SAS HD connectors and achieves up to 1.2M 4K IOPS and 6.4GB/s throughput per controller with only two microseconds of added latency.

In addition, ATTO Technology will have on display [ATTO ThunderLink® Thunderbolt™ adapters](#), [ATTO Celerity™ Fibre Channel HBAs](#), and [ATTO FastFrame™ Ethernet adapters](#).

Those interested in scheduling a meeting with ATTO at the retreat can visit <https://www.atto.com/tradeshow/hpa>.

ABOUT ATTO

For over 30 years ATTO Technology, Inc. has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host bus adapters, network adapters, storage controllers, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS, SATA, iSCSI, Ethernet, NVMe and Thunderbolt. ATTO is the Power Behind the Storage.
