

ATTO Technology certifies GB Labs' FastNAS storage with their 40GbE Thunderlink

GB Labs, innovators of intelligent storage and providers of a comprehensive range of online, near line, backup and archive solutions for Media and Entertainment workflows, have worked closely with ATTO Technology in order to benefit from coordinated support between GB Labs and themselves.

For 30 years, ATTO Technology Inc. has been a global leader across the IT and Media and Entertainment markets, specialising in network connectivity and infrastructure solutions. They manufacture host and RAID adapters, network adapters, storage controllers, Thunderbolt™ adapters and software.

ATTO have recently certified their 40GbE Thunderlink with GB Labs' FastNAS, which will allow customers to connect Thunderbolt 3 to GB Labs' high performance storage. The convenience of Thunderbolt, which sends data and video over the same protocol, paired with flash storage opens the range of what can happen with media files.

“The partnership between ATTO Technology and GB Labs delivers proven tested solutions that fit customer needs across a broad range of storage product offering for performance and flexibility in the Media and Entertainment markets, as well as for content generation and management in general.” - Tom Kolniak, Senior Director of Marketing at ATTO Technology Inc.
