FOR IMMEDIATE RELEASE

ATTO Technology Exhibits Industry's Fastest Performing Storage Connectivity Products at SNW

The most advanced technology in the storage market today

Storage Networking World, Phoenix, AZ (October 12, 2009) – ATTO Technology, Inc., a global leader of storage connectivity and infrastructure solutions for data-intensive computing environments, announced that they will be exhibiting the most advanced storage connectivity technology in the market at the Storage Networking World Conference this week. ATTO continues its 20-year history of setting first-to-market precedence with its [ExpressSAS 6Gb/s SAS/SATA Host Adapters](#) on display along with their entire high-performance storage connectivity product lines with Fibre Channel, SAS, SATA, SCSI, iSCSI and GigE interfaces.

ATTO takes SAS and SATA technology to the fastest and highest levels available today with its [ExpressSAS 6Gb/s SAS/SATA Host Adapters](#). The only company to provide 6Gb/s SAS/SATA host interface connectivity to storage, ATTO has engineered the ultimate in flexibility with five models featuring initiator and target drivers and various combinations of internal and external connections.

The ATTO Celerity Quad-Channel Fibre Channel Host Adapter provides the highest Fibre Channel throughput available, 1600 MB/s per port, through eight lanes of PCIe 2.0 bus interface bandwidth. Also available in single- and dual-channel, [Celerity Fibre Channel Host Adapters](#) include both target and initiator drivers for integration into workstations or storage enclosures. Celerity HBAs combine ATTO's proprietary technology, management software and superior technical support to provide the best performance and reliability in the industry.

The first 8Gb/s Fibre Channel to SAS/SATA independent RAID storage controller, the [ATTO FastStream SC 8500](#) allows you to build a Storage Area Network (SAN) using previously direct-attached SAS/SATA storage and add the highest levels of RAID protection while maintaining performance levels.

ATTO continues to fully support the industry's most popular and fastest growing operating systems including the latest Microsoft® and Mac® , Linux and VMware® operating systems.

ATTO representatives will be at kiosk A3 at the conference to answer questions, provide storage connectivity solution guidance and more complete technical details for all ATTO products.

About ATTO Technology, Inc.

ATTO Technology, Inc. is a global leader of storage connectivity and infrastructure products for data-intensive computing environments. ATTO provides a wide range of end-to-end solutions to help customers better store, manage and deliver their data. With a focus toward markets that require higher performance, ATTO manufactures host adapters, RAID adapters, bridges, RAID storage controllers, virtual tape appliances and management software. ATTO solutions are based on providing a high level of connectivity to all storage interfaces including SCSI, iSCSI, SAS/SATA, Fibre Channel and FCoE. ATTO distributes its products worldwide directly to Original Equipment Manufacturers (OEMs), systems integrators, VARs and authorized distributors. Contact ATTO Technology, Inc. world headquarters, at 155 CrossPoint Parkway, Amherst, New York 14068; phone (716)691-1999, fax (716)691-9353, or website, www.attotech.com.
