FOR IMMEDIATE RELEASE

ATTO Technology Announces Immediate Support
for Microsoft Windows 7

Windows 7 supported across ATTO Product Lines

Amherst, New York (October 22, 2009) – ATTO Technology, Inc., a global leader of storage connectivity and infrastructure solutions for data-intensive computing environments, announces driver support for its complete line of host adapters for Microsoft Windows 7. ATTO Celerity Fibre Channel Host Adapters, ExpressSAS SAS/SATA RAID and Host Adapters and ExpressPCI SCSI Host Adapters, are PCI Express (PCIe 2.0 and PCIe) and PCI-X adapters that provide high-performance storage connectivity.

"ATTO reinforces its commitment to the Windows market by being the first host adapter vendor to deliver support for the newest Microsoft operating system, Windows 7. Windows users can now choose from a full spectrum of high-performance adapters for Fibre Channel, SAS/SATA and SCSI environments," states Tom Kolniak, director of products for ATTO.

ATTO Technology Inc., a Microsoft Gold Certified Partner, has built and tested their host adapters and drivers for interoperability and performance with the latest Windows architecture. Windows users can rely on ATTO to deliver comprehensive lines of HBAs that are tailored to the performance demands of video and IT professionals.

ATTO offers storage connectivity solutions for both Storage Area Network (SAN) and Direct Attached Storage (DAS) environments. With a wide range of features, port configurations and performance levels, Celerity 8Gb/s and 4Gb/s Fibre Channel, ExpressSAS 6Gb/s and 3Gb/s SAS/SATA RAID and Host Adapters and ExpressPCI SCSI HBAs are the premier choice for data-intensive IT and digital media applications such as tape backup, data warehousing, high-definition video post-production and digital film production.

Windows 7 is also supported by ATTO's Power Center software – a unique Windows-based software utility that maximizes productivity by delivering exceptional striping performance across single and multiple RAID arrays for attached storage applications. With ATTO's Smooth Data Optimization (SDO™) Technology and other built-in intelligence, data can be efficiently striped across RAID arrays without interruption. By using the intuitive easy-to-use GUI users can quickly and efficiently manage their RAID groups.

ATTO's Fibre Channel, SAS/SATA and SCSI host adapters are used worldwide to support Microsoft hardware systems running Windows 7. The latest drivers are available for download at www.attotech.com.

About ATTO Technology, Inc

ATTO Technology, Inc. is a global leader of storage connectivity and infrastructure products for data-intensive computing environments. ATTO provides a wide range of end-to-end solutions to help customers better store, manage and deliver their data. With a focus toward markets that require higher performance, ATTO manufactures host adapters, RAID adapters, bridges, RAID storage controllers, virtual tape appliances and management software. ATTO solutions are based on providing a high level of connectivity to all storage interfaces including SCSI, iSCSI, SAS/SATA, Fibre Channel and FCoE. ATTO distributes its products worldwide directly to Original Equipment Manufacturers (OEMs), systems integrators, VARs and authorized distributors. Contact ATTO Technology, Inc. world headquarters, at 155 CrossPoint Parkway, Amherst, New York 14068; phone (716) 691-1999, fax (716) 691-9353, or website, www.attotech.com.
