FOR IMMEDIATE RELEASE

ATTO Technology Announces MultiPath Director™ - Industry's First Cross-Platform Solution for Workstation Connectivity to Enterprise Storage

High-Availability Fibre Channel Solution for Media and Entertainment Customers

Amherst, NY (April 8, 2010) – ATTO Technology, Inc., a global leader of storage connectivity and infrastructure solutions for data-intensive computing environments, today announced the first and only Fibre Channel connectivity solution that enables workstations in heterogeneous operating environments to connect directly to enterprise-class storage systems. ATTO's [MultiPath Director™](#), a high-performance and feature-rich solution that keeps data available in real time for multiple users, is now incorporated into ATTO's [Celerity 8Gb/s Fibre Channel Host Bus Adapters](#). MultiPath Director provides professional communities in media and entertainment, education, government, scientific, and many other growth markets, the option to integrate enterprise-class storage features into workstation applications.

Available with ATTO's single-, dual- and quad-channel 8Gb/s Fibre Channel HBAs and fully-qualified for use with the ATTO [FastStream™ RAID Storage Controller](#), MultiPath Director addresses workstation-level needs for load-balancing and automatic path failover, features that were previously available only at the server level. MultiPath Director provides multiple redundant paths to enterprise storage for high-performance connectivity and is qualified with leading enterprise-class storage vendors. By enabling multiple workstations to connect to high-end Fibre Channel storage, MultiPath Director creates a shared storage environment. It allows users to efficiently collaborate on projects and gain real-time access to content in heterogeneous environments that deploy Windows®, Linux and Mac® servers and workstations.

“ATTO has always been dedicated to providing unique and valuable features in our products that help our customers do their work more efficiently,” states Tom Kolniak, Director of Products for ATTO Technology Inc. “With the announcement of MultiPath Director, we are providing a solution that meets the high-availability demands of applications in media and entertainment SAN environments. We are the first to bring to market a Fibre Channel storage connectivity solution that allows our customers to connect their cross-platform workstations to enterprise-class storage systems.”

About ATTO Technology, Inc.

ATTO Technology, Inc. is a global leader of storage connectivity and infrastructure solutions for data-intensive computing environments. ATTO provides a wide range of solutions to help customers store, manage and deliver their data more efficiently. With a focus toward markets that require higher performance, ATTO manufactures host and RAID adapters, converged network adapters, bridges, switches, RAID storage controllers, and management software. ATTO solutions provide connectivity to all storage interfaces including SCSI, SATA, iSCSI, SAS, Fibre Channel, FCoE and 10GbE. ATTO distributes its products worldwide directly to Original Equipment Manufacturers, systems integrators, VARs and authorized distributors. Contact ATTO: 155 CrossPoint Parkway, Amherst, NY 14068; Phone: (716)691-1999; website: attotech.com.
