ATTO Technology Expands Relationship with Quantum

Providing joint storage and connectivity solutions for today's high-performance environments

Amherst, New York (February 09, 2015) – For over 25 years, ATTO Technology, Inc. has been manufacturing high-performance storage and network connectivity products. Today the company announced it has further expanded its long-standing relationship with Quantum by making Celerity™ Fibre Channel Host Bus Adapters (HBAs) with MultiPath Director™, ExpressSAS™ HBAs and Thunderbolt™ 2 technology enabled ThunderLink™ Desklink Devices available directly through Quantum's sales channels. These products are supported by extensive testing and complete certifications with Quantum's StorNext Q-Series storage systems, StorNext AEL archives and Scalar tape libraries.

As the only manufacturer to allow direct connectivity of both servers and workstations to Enterprise-level storage, ATTO is uniquely positioned to provide a high-performance connectivity solution for Quantum's scale-out storage, archiving and data protection solutions. In addition to managing multiple paths between Windows®, Linux® and Mac® workstations, ATTO's solutions for Quantum enable high throughput and uninterrupted access in a variety of environments including big data, data backup and recovery, archiving and virtualization.

"Quantum enables customers to capture, share and preserve their digital assets in the most demanding workflow environments, which requires high-performance connectivity for access to the data whenever and wherever it's needed," said Dave Frederick, Senior Director, Product Marketing at Quantum. "We're pleased to be expanding our partnership with ATTO by offering their Fibre Channel and SAS HBAs and Thunderbolt Desklink Devices configurable on Quantum's price list."

ATTO's Celerity Fibre Channel HBAs and Thunderbolt enabled Desklink Devices provide an ideal solution for users looking to achieve the highest I/O and data throughput for growing digital assets and heterogeneous application environments enabled by Quantum's StorNext scale-out storage solutions. Both product lines feature ATTO's proprietary Advanced Data Streaming Technology (ADS™) and MultiPath Director Technology providing consistent and reliable data transfers protecting the users digital assets, while streamlining their workflow.

Quantum's Scalar intelligent tape libraries provide best-in-class performance, reliability, scalability and cost-effectiveness for long-term data protection and archive. When used in combination with ATTO's ExpressSAS HBAs, they benefit from low-latency and high-bandwidth connectivity to ensure consistent data transfers and protection.

"The technology based partnership between ATTO and Quantum is a key step as we ensure a validated storage solution for today's complex enterprise environments and gives users the confidence that their storage infrastructure will have the highest performance and lowest latency," said Wayne Arvidson, vice president of marketing and channels at ATTO Technology, Inc. "Today's announcement is a key step as we continue to develop and release further solutions together throughout the year."

About ATTO Technology, Inc.
ATTO Technology, Inc. is a global leader of storage connectivity and infrastructure solutions for data-intensive computing environments. ATTO provides a wide range of solutions to help customers store, manage and deliver their data more efficiently. With a focus toward markets that require higher performance, ATTO manufactures host and RAID adapters, converged network adapters, bridges, switches, RAID storage controllers, and management software. ATTO solutions provide connectivity to all storage interfaces including Fibre Channel, SAS, SATA, iSCSI, FCoE, 10GbE and Thunderbolt. ATTO distributes its products worldwide directly to Original Equipment Manufacturers (OEMs), systems integrators, VARs and authorized distributors. Contact ATTO Technology, Inc. world headquarters at: 155 CrossPoint Parkway, Amherst, New York 14068; Phone: +1 716 691 1999; Fax: +1 716 691 9353; Website: attotech.com.
