FOR IMMEDIATE RELEASE

ATTO Technology Sponsors SCSI Trade Association Showcase: "Taming the Data Beast"

Amherst, NY (May 9, 2012) – ATTO Technology, Inc. is proud to sponsor the SCSI Trade Association (STA) showcase, "Taming the Data Beast" taking place on Wednesday, May 9 in the Santa Clara Hyatt in Santa Clara, California. The event features product and technology demonstrations, speakers from the industry and opportunities for participating companies to establish or expand existing relationships.

"As one of the industry leaders in storage connectivity, we feel it is important to participate with standards organizations like the SCSI Trade Association," said Wayne Arvidson, vice president of marketing at ATTO Technology, Inc. "This showcase brings together the leading minds in the business, and we are excited to be a part of the day's proceedings. As STA continues to drive next generation standards such as 12Gb/s SAS, our involvement ensures the market that our products will be fully certified and shipping as other key components, such as drives, become available."

Testament to ATTO's dedication to meeting industry standards and providing access to the latest drive configurations available, it became the first company to ship host bus adapters utilizing PCIe 3.0 technology in 2011. The ExpressSAS H6F0 GT is capable of speeds up to 8Gb/s in a single slot and is available with 16 external mini-SAS HD ports. It is designed to support a dense and efficient connection to external storage from rack mount servers and workstations in data center, data warehousing, VOD and other high-availability, high-performance applications.
