FOR IMMEDIATE RELEASE

ATTO Supports Apple® Release with Connectivity Solutions

ATTO's Line of Thunderbolt technology enabled products revolutionize connectivity to storage

Amherst, NY (October 22, 2013) – ATTO Technology, Inc., a global leader of storage and network connectivity and infrastructure solutions for data-intensive computing environments, today confirmed their continued commitment to the newly released line of product updates and innovations from Apple. With the powerful OS X® Mavericks operating system now available and the radically redesigned Mac Pro® shipping in December, ATTO continues to support the new offerings from this industry leading manufacturer. “Our deep relationship with Apple over the last 25 years continues to drive our position as a leading force within the Apple community,” said Timothy J. Klein, president and CEO at ATTO Technology.

The new OS X Mavericks operating system sets a new standard for Apple OS performance and complements why users select ATTO products. As Apple pushes the boundaries of OS X functionality, ATTO continues to provide industry leading products that optimize compatibility and performance.

The anticipated release of the Mac Pro and OS X Mavericks has sparked the imagination of the high-end creative professional. ATTO is the recognized leader in powering high-performance audio and video workflows including 2K, 4K, 3D stereoscopic and high-definition production. With an unprecedented six Thunderbolt 2 ports, connectivity to the Mac Pro for high-performance network and storage infrastructures is enabled via ATTO's industry leading Desklink™ devices. Previous generations of the Mac Pro, that will be upgrading to OS X Mavericks, can utilize ATTO's full product offering, including host bus adapters (HBAs), network interface cards (NICs) and converged network adapters (CNAs), to leverage the new performance capabilities.

ATTO is a pioneer in Thunderbolt enabled solutions and first to market with compatible OS X Mavericks drivers for their HBAs, NICs, CNAs and Desklinc devices. ATTO has worked closely with Apple to provide proven Thunderbolt connectivity to high-performance Fibre Channel and SAS/SATA storage, as well as 10Gb/s Ethernet networks. Now you can connect to your storage from virtually anywhere, through any protocol, with ATTO's diverse line of Thunderbolt technology enabled products.

“As an innovator in Thunderbolt technology and leader in the Apple market, ATTO is well prepared for the release of the Apple OS X Mavericks and the new Mac Pro,” said Wayne Arvidson, Vice President of Marketing at ATTO Technology. “Like ATTO, Apple has reaffirmed their commitment to the high-performance professional market by supporting the next generation of Thunderbolt technology and we are excited to continue our long standing relationship with Apple by providing products that offer users premium performance and maximum usability. ”

Products are available through the Apple Store, value-added resellers and the ATTO website.
