

ATTO Technology, Inc.

Powering High-Performance Storage & Network Connectivity

Who is ATTO?

ATTO Technology, Inc., headquartered in Amherst, New York, is a global leader of storage connectivity and infrastructure solutions for data-intensive computing environments. Our vision is to provide a wide range of end-to-end solutions to help customers better store, manage and deliver their data. Our experience in integrating advanced technology into real-world product solutions provides customers a unique competitive advantage.

With a focus toward markets that require higher performance, ATTO manufactures host bus adapters, network adapters, RAID adapters, bridges, RAID storage controllers, switches and management software. Our solutions are based on providing a high level of connectivity to all storage interfaces including Fibre Channel, SAS, SATA, SCSI, iSCSI, FCoE, 10 Gigabit Ethernet and Thunderbolt.

Why our technology works for you

- Over 23 years of providing the industry's broadest portfolio of high-performance storage & network connectivity products
- Widest range of protocols
- Full spectrum of connectivity: The only manufacturer that allows you to connect both workstations and servers to enterprise-class storage
- International sales and marketing presence: Solutions qualified and certified with the industry leading workstation, server, storage, & application vendors
- Domain expertise: Solution for the most difficult challenge – low latency, high-bandwidth transactions
- Have leveraged our expertise into existing markets to solve this challenge for all technologies with similar performance requirements and work flows
- Active member of prominent technology developer groups and standards associations including: NAB, SBB, SNIA, STA, Intel Developer Program, Intel Systems Alliance

Markets

Media & Entertainment | Oil & Gas | Data Center
Healthcare & Life Sciences | Education
Government | Telecommunications

Specialities

High-Performance | Low-latency
Streaming Data Environments
Multiple Protocol Support

Technical & Channel Programs

The ATTO Technology Access™ technical partner and Accelerate™ channel partner programs are designed to build and strengthen relationships through interoperability testing, sales incentives, co-marketing efforts, training and more. ATTO is committed to helping customers build a profitable business and have the assurance of a tested, certified solution.

Solutions

Workstation

- Heterogeneous connectivity
- Direct workstation connectivity to enterprise-class storage system partners including EMC, HP, IBM, NetApp

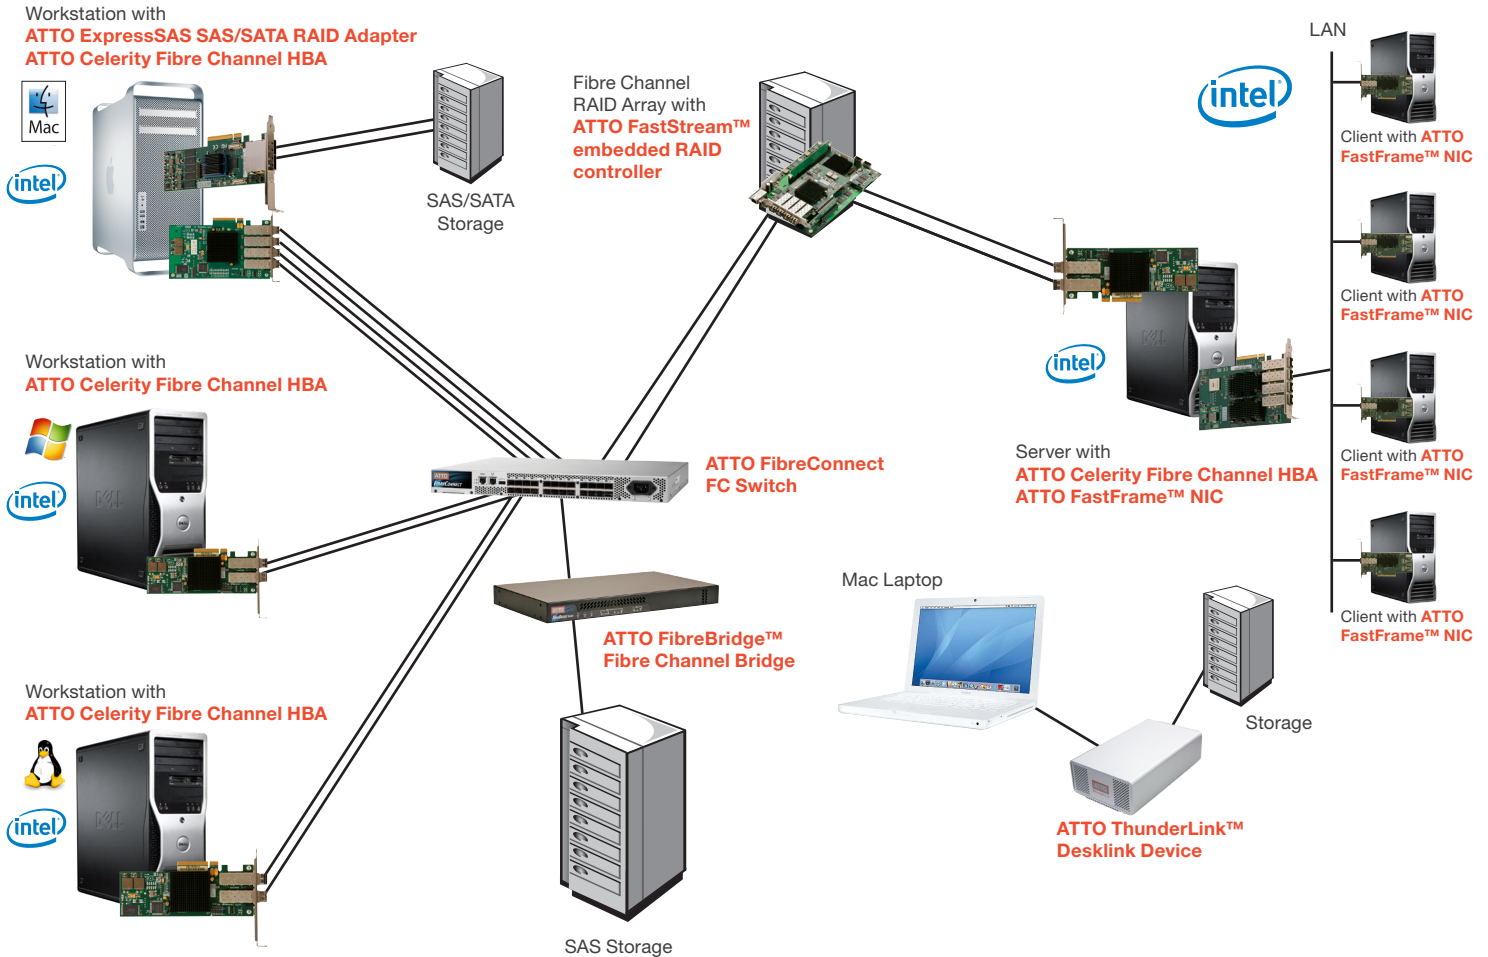

Server

- Low power consuming products
- Compatible with Intel Server Boards and listed on Intel Server Configurator
- VMware and Hyper-V Certified

Storage

- Tested and certified interoperable with leading vendors
- Support for Direct Attached, Shared and Network Based Storage Solutions

Storage & Network Connectivity Fibre Channel | SAS | SATA | SCSI | iSCSI | FCoE | 10GbE | Thunderbolt

The ATTO Difference

Advanced Data Streaming (ADS™) Technology
Provides consistent data transfer rates & managed latency

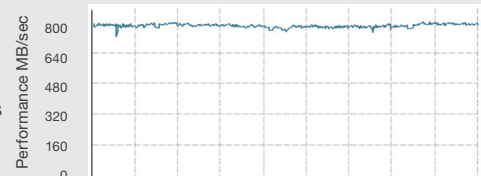

CacheAssure™ Technology
Protects cached data while eliminating need to monitor, maintain, replace & dispose of batteries

DriveAssure™ Technology
Prevents premature drive failures & slow-downs to maximize system uptime

MultiPath Director™ Technology
Only solution in the industry that allows both servers & workstations to directly connect to enterprise-class storage

ATTO Config Tool™
Helps customize the settings of your ATTO host bus adapter to maximize the performance of your storage connection
