FOR IMMEDIATE RELEASE:

ATTO ThunderLink® 3128 Thunderbolt™ 3 Adapter is Now Shipping

Provides 12Gb/s SAS/SATA Connectivity for Thunderbolt 3 Platforms

Amherst, NY (May 10, 2018) - ATTO Technology, Inc., a global leader of storage, network connectivity and infrastructure solutions for data-intensive computing environments for 30 years, announced today they are now shipping the new ATTO ThunderLink® 3128 Thunderbolt™ 3 to 12Gb SAS/SATA adapter.

The latest addition to the [ATTO Thunderbolt](#) adapter family, [ThunderLink 3128](#) provides users with fast and reliable storage connectivity while enabling scalability for next generation platforms and infrastructures. Optimized for extremely low latency and high-bandwidth data transfers, ThunderLink 3128 offers flexibility and reliability for the most demanding applications.

"The anticipated Thunderbolt 3 to 12Gb SAS/SATA adapter enhances the industry's broadest portfolio of Thunderbolt adapters for storage and network connectivity," said Tom Kolniak, senior director of marketing at ATTO Technology, Inc. "What sets ATTO apart is our extensive history of SAS/SATA development, creating Thunderbolt solutions and working to create products which are optimized to meet modern workflow demands."

The increased performance of Thunderbolt 3 allows users to maximize their workflow, providing flexibility in otherwise restrictive considerations like lead times, footprints, personnel costs and scheduling. ThunderLink 3128 has been certified for both Mac® and Windows® and supports the latest Thunderbolt 3 platforms including all-in-ones and desktop and mobile workstations.

In addition to the latest Thunderbolt 3 platforms, ThunderLink 3128 has been interoperability tested with popular media and entertainment applications, HDDs, SSDs and the latest LTO-8 tape drives.

Connecting a Thunderbolt 3 to 12Gb SAS/SATA adapter outfitted with LTO 8 tape drives provides a simple and affordable means to store, archive and transport large amounts of content. This combination is a cost effective way to manage media files and their ever-increasing sizes (UHD, 4K, 3D, etc.). ThunderLink 3128 also provides a faster ROI for storage by addressing the need to grow storage capacity on the fly which has become more critical than ever across a number of industries.

The 3128 is the latest in a comprehensive portfolio of ATTO ThunderLink adapters providing solutions in Thunderbolt 3 and 2 environments for Fibre Channel, Ethernet and SAS/SATA connectivity. ThunderLink adapters deliver creative, engineering and technical professionals a high performance and low latency Thunderbolt connectivity solution engineered for applications where optimized performance and high throughput are essential.

ABOUT ATTO

For 30 years, ATTO Technology, Inc. has been a global leader across the IT and media & entertainment markets, specializing in storage and network connectivity and infrastructure solutions for the most data-intensive computing environments. ATTO works with partners to deliver end-to-end solutions to better store, manage and deliver data. Working as an extension of customer's design teams, ATTO manufactures host and RAID adapters, network adapters, storage controllers, Thunderbolt™ adapters, and software. ATTO solutions provide a high level of connectivity to all storage interfaces, including Fibre Channel, SAS, SATA, iSCSI, Ethernet, NVMe and Thunderbolt. ATTO is the Power Behind the Storage.
