

ATTO Technology, Inc.

Express Power Center

Featuring Smooth Data Optimization (SDO™) for Blazing Fast Performance

Product Features

Blazing Fast Performance

- Experience dramatic improvements to read/write performance
- Whether operating in a video or an IT environment, you can optimize performance by tailoring your stripe interleave size to your application

Smooth Data Streaming

- Ensure that data is written reliably and most efficiently without disruption using ATTO's exclusive Smooth Data Optimization (SDO™) technology
- Dependably run more streams of video, with complex transitions and effects, without the risk of dropping frames

One-Click Installation

- Quickly and easily install the application using a one-click software setup utility
- Easily identify target storage devices and create and manage stripe groups using a simple configuration GUI

ATTO Express Power Center is a disk storage software striping utility that supplies you with the power to maximize attached storage when using ATTO Celerity Fibre Channel and ExpressPCI SCSI host adapters. Vital for audio/video, digital content creation, large-scale database and other high-performance applications, ATTO Express Power Center incorporates exclusive Smooth Data Optimization (SDO™) technology to transfer data reliably at a blazing fast pace when working in a Microsoft Windows® environment. ATTO Express Power Center can maximize I/O by matching interleave sizes with typical disk data transfer requests based on your application. The power of ATTO's exclusive software architecture, when combined with the unmatched performance of Celerity, will boost your productivity levels to new heights.

Technical Highlights

- Supporting Windows Vista, Server 2003, XP and 2000 environments
- RAID 0 support to allow striping across multiple arrays using ATTO Celerity and ExpressPCI host adapters
- Exclusive Smooth Data Optimization (SDO™) technology
- Selectable interleave sizes up to 1MB
- Enhances performance of ATTO Celerity host adapters
- User friendly GUI interface
- Seamlessly port stripe groups between systems

ATTO Express Power Center

ATTO Technology, Inc. Featuring Smooth Data Optimization (SDO™) for Blazing Fast Performance

Specifications	
Applications	<ul style="list-style-type: none"> Support for digital media workgroup and large-scale database solutions. Applications include audio/video, fixed content, database and other I/O intensive environments requiring RAID 0 functionality
Advanced Capabilities	<ul style="list-style-type: none"> Enhances performance of ATTO Celerity and ExpressPCI host adapters Exclusive Smooth Data Optimization for unmatched RAID 0 performance Simple GUI for managing stripe groups User selectable interleave sizes up to 1MB Seamless portability of stripe groups between systems
System Requirements	
Operating Environment	<ul style="list-style-type: none"> Windows Vista Windows Server 2003 Windows XP Windows 2000
Host Adapter Driver	<ul style="list-style-type: none"> Celerity Windows Driver version 2.16 required
Ordering Information	
Model Number	<ul style="list-style-type: none"> EPCI-PWRC-000

ATTO Celerity throughput comparison between ATTO Express Power Center and Microsoft Windows striping depicted in read/write performance.

NOTE: Read/Write performance obtained using ATTO Celerity 4Gb PCI-X host adapter in conjunction with 4Gb RAID array. Individual results may vary.
