ATTO360 Storage

MANAGEMENT, OPTIMIZATION, MONITORING, AND ANALYTICS APPLICATION FOR ATTO FIBRE CHANNEL, SAS, AND NVME HOST ADAPTERS

OVERVIEW

An all-purpose tool for managing, optimizing, and monitoring ATTO host adapters. ATTO360 Storage™ evolved from ATTO's ConfigTool and combined features from ATTO360 Networking™ to create the industry's most robust management utility designed to enhance ATTO Celerity Fibre Channel, ExpressSAS, and ExpressNVM host adapters.

Featuring 1-click tuning profiles that boost performance, complete management of your ATTO device including Multipath Director to access failover and load balance settings, and ATTOexpert AI™ that monitors in real-time thousands of metrics and offers instant advice to solve bottlenecks, guarantee delivery, and eliminate costly downtime. ATTO has leveraged its deep understanding of shared storage and combined the tools and techniques our engineering team uses every day and put them into this unique, simple, and easy to use management interface.

PERFORMANCE TUNING

Automatically boost performance with easy one-click setup. ATTO360 Storage offers several per-configured performance optimization profiles for macOS®, Windows®, and Linux®.

- Preset tuning profiles for different workflows like high throughput, low latency, high IOPS, and tape connectivity
- Remote feature allows profiles to be set on any ATTO device across a network

ADVANCED MANAGEMENT

ATTO360 Storage offers a simple interface to easily monitor and manage ATTO host bus adapter settings for specialized applications.

- View drivers and flash files currently in use
- Easily update the firmware
- Collect diagnostic logs
- Configure adapter settings
- Multipath Director – manage failover & load balancing from single pane of glass

ATTOEXPERT AI

Troubleshoot ten times faster with a triage center for connectivity issues with intuitive features that keep you running efficiently, pro-actively fix problems before they occur, and get instant advice from ATTO network engineers using ATTOexpert AI built into ATTO360 Storage.

- Scans for frequently recorded and troublesome errors that are not always obvious
- Automatic diagnostic alarms provide alerts to potential issues saving valuable time and resources
